Institute of Nutrition, Mahidol University (INMU)  
999 Phutthamonthon 4 Rd., Salaya, Phutthamonthon  
Nakhon Pathom 73170, Thailand

**Name** Pattanee Winichagoon  
พัฒนี วินิจฉกุล

**Email Address:** pattanee.win@mahidol.ac.th

**Current positions:** Associate Professor

## Educational Qualifications :

- 1991 Ph.D. (International Nutrition), Cornell University, U.S.A.  
1976 M. S. (Nutrition), University of Hawaii, U.S.A.  
1972 B. Sc. (Food Technology) (second class honor)  
Chulalongkorn University, Thailand

## Publications:

## Research Interests:

1. Maternal and child nutrition, field efficacy/effectiveness of micronutrient interventions, bioavailability of micronutrients
2. Use of stable isotope methods in maternal and child nutrition  
Community-based nutrition program: Analysis of policy and program implementation

## Research Experiences:

1. Using Stable Isotope Techniques to Monitor Situations and Interventions for Promoting Infant and Young Child Nutrition in Asian region (IAEA-RAS/6073) (Designated Team Member)
2. Sustainable Micronutrient Interventions to control deficiencies and Improved Nutritional status and General health in Asia (SMILING), EU FP7, 2012-14.
3. Infant feeding practices in transition: Breast milk intakes, complementary feeding and body composition during Infancy in Thailand. Doctoral CRP/IAEA 2011-15. (PI).
4. Assessment of body composition and total energy expenditure in children. IAEA National TC (extension) (THA 6038). 2012-2013.(PI)
5. Optifood – an Approach to Improve Nutrition, UBS Optimus Foundation. 2010-11. (co-PI)
6. Maternal and child nutrition research. National Research University-Mahidol University grant, (PI)
7. Evaluating impact of locally developed food on nutritional status of infants and preschool children (PI), 2009-2011. (National TC, Thailand, IAEA-THA/6/035)
8. Efficacy of vitamin A in fortified extruded rice in school children in Thailand, 2009-2010. (co-PI) (IAEA).
9. Efficacy of iron, zinc and vitamin A fortified rice on zinc status of school-aged children in Satun, Thailand, 2009-10 (ETH funding) (co-investigator)
10. Iodine supplementation during pregnancy and lactation in mild-to-moderately iodine-deficient women: effects on pregnancy outcome and infant development (co-PI), 2008-2011. (Swiss National Fund)
11. Long-Term Effects of Iron and Zinc Supplementation During Infancy on Cognitive Performance and Growth 8 Years Later: A Follow-Up Study (co-investigator), 2008-9. (Ellison Foundation and INMU small grant on child nutrition)
12. Efficacy of multiple micronutrient fortified biscuits and deworming on reducing anemia prevalence, and improving micronutrient status, cognitive function, and growth in Vietnamese school children, 2006-8 (Neys Foundation, Nederland) (PI)
13. Iron absorption and utilization in thalassemia: does iron fortification pose a risk? 2007-8. (IAEA and SUSTAIN) (co-investigator)
14. Measuring iodine status in matched pairs of Thai pregnant women and their school-age children: assessing the value of urinary iodine concentration (PI), 2007-8. (Swiss Federal Institute of Technology small grant)
